these symbols in order to form a picture of
the world. This picture is then compared
with the actual world, and the mind is able
to correct its picture if it is found to be
inaccurate. This process is repeated until the
picture is a true representation of the world.

a discussion of the function of the mind in
the process of learning. It is shown that the
function of the mind is to learn from
experience, and that this function is achieved
by the use of symbols. The symbols are used
to represent the objects of the world, and the
mind is able to manipulate these symbols in
order to form a picture of the world. This
picture is then compared with the actual world,
and the mind is able to correct its picture if
it is found to be inaccurate. This process is
